## ◆ Perfect Stitch Quality

### Box feed Industrial Sewing Machine Technology

In order to provide beautiful seams and outstanding feed performance, JUKI adopted box feed system. The conventional feed mechanism is oval motion. On the other hand, the box feed moves the feed dog in a box motion. This eliminates material shrinking and shifting.

As the feed dog is in contact with the material longer, the machine feeds the project better.

No fabric shrinkage even sewing on extra light weight materials.

Thick handle can be sewn with ease.

### Powerful feeding

HZL-G series has powerful feeding thanks to the improved presser foot construction. Heavy material projects, such as hemming denim jeans, can be sewn with ease!

3-12-3 layers of denim.

## ◆ Auto Thread Trimming Function

One single action automatically trims both upper and bottom threads at the same time. It eliminates waste of your thread and time!

HZL-G220 Only

## ◆ Wide Sewing Space

HZL-G series has a wide underarm space. It is more enjoyable and comfortable to work with large projects.

## ◆ High Quality Buttonholes

HZL-G series sews beautiful buttonholes regardless of the type of material. 8 types of buttonholes are available for your needs.

## ◆ Automatic Needle Threader

The Automatic Needle Threader easily threads the needle without eyestrain and allows you to start sewing quickly.

## ◆ Quick Bobbin Preparation

Just follow the guide and it is not necessary to pull up the bobbin thread.

## ◆ LED Light

LED lights brighten the needle area for better material handling.
